Product: Garden Sauna Model: QUBE

Purpose:

1. **Relaxation and unwinding:** The garden sauna is the perfect place to relax after a long day. The heat and humidity help to calm the mind and reduce stress.
2. **Body detoxification:** The high temperature in the sauna causes sweating, which helps remove toxins from the body and improves the condition of the skin.
3. **Improved circulation:** The heat of a sauna dilates blood vessels, which can aid blood circulation and contribute to better oxygenation of tissues.
4. **Relief of aches and pains:** Regular sauna use can help relieve muscle and joint pain and the symptoms associated with rheumatism.
5. **Boosts your immune system:** Exposure to high temperatures can improve the function of your immune system, which helps prevent colds and other illnesses.
6. **Socialization:** A garden sauna can become a meeting place with family and friends, promoting shared relaxation and building relationships.
7. **Space for meditation and reflection:** In the silence of the sauna you can find a moment for yourself, for meditation or reflection on everyday matters.
8. **Enriching your garden space:** A garden sauna is an attractive element of small architecture that can increase the aesthetic and functional value of your garden.
