

Product Card

Product: Garden Office Model: QUBE

Purpose:

1. **Workspace:** A garden office serves as an alternative workspace that can promote better concentration and creativity. Employees have access to fresh air and natural light, which can positively impact their well-being and productivity.
2. **Relaxation and rest:** This type of office can also be used as a relaxation area where employees can relax during breaks from work or conduct informal meetings.
3. **Integration with nature:** Office space located outdoors or surrounded by greenery can help reduce stress and improve employee well-being through contact with nature.
4. **Sustainability:** Garden offices are often designed with sustainability in mind, which may include the use of eco-friendly building materials, efficient energy systems and consideration for the surrounding ecosystem.
5. **Educational functions:** Such offices can also conduct educational activities related to ecology, sustainable development or gardening, which can attract customers and support a positive image of the company.
